

IS YOUR PET OVERWEIGHT?

HOW TO ASSESS YOUR PET'S WEIGHT

- Can your pet's ribs be felt upon gentle palpation on their sides?*
- Does your pet have a waist?*
- Does your pet have trouble or is your pet slow to rise and move around?*
- Is your pet reluctant to exercise?*
- Does your pet tire easily with exercise?*
- A complete physical examination is most important as diseases such as hypothyroidism can cause weight gain*
